**TRUNK ROAD TO BE  
BUILT ON CROW  
LINE**

Minister of Public Works of  
British Columbia Issues  
a Statement

"My department will have the spending of four and a quarter millions, in round numbers, this year, the great bulk of the huge appropriation being for roads and bridges. To see that this money is spent carefully, and with a view to permanent results, is now the object of the department," said Hon. Thomas Taylor minister of public works for the province, who was a visitor in Nelson last evening.

Mr. Taylor arrived from the coast on Monday night, here meeting J. H. Schofield, M. P. P., for Yoho Park, he spent yesterday in visiting various parts of the constituency. Returning to the city again last night, he leaves this morning on the Crow boat.

Inspecting Trunk Road

"My visit," said Mr. Taylor, "is in connection with the trunk road through the southern portion of the province. When completed, it will extend from Vancouver, on the coast to the Crow's Nest, on the Alberta boundary, a distance of 750 miles. Two thirds of it is now in existence, some of it being old road but the greater portion, road that we ourselves have constructed. The remaining third will consist of a number of scattered links of greater or less length. While my information is not complete, I believe that the cost of the present construction will not be over a quarter of a million."

"The most difficult section is that over the Hope mountains, and for the ascent to the summit, we have decided to make use of the old Sapperton and business road, which as you know, is a very fine highway. When the descent on this side is made, we will connect with the existing road which goes clear through to Rossland. At Trail it will be necessary to construct a bridge across the Columbia. At or near Creston, on the Crow, the Kootenay river will also have to be bridged.

Local News

W. Ross has been appointed accountant of the Mercantile in place of J. McCracken who resigned.

Are you going to build? If so it will pay you to see F. Gainey and get his prices. See ad. in this paper.

Another shift was put on in the International on Tuesday morning. The output at the mine is steadily increasing.

Prof. White who was killed last week near Crow's Nest was buried from the Summit hotel on Saturday at noon.

May Day was observed by our Slavonian citizens and picturesque decorations were scattered in various parts of the town.

Mrs. Jones left on Monday morning for Phoenix B. C. where Mr. Jones is working at present. Mrs. Jones' departure will be much regretted by all.

The Rev. J. Sergeant preached his farewell sermon to a large congregation on Sunday evening last. Mr. Sergeant expects to leave Blairmore next Thursday.

A public meeting will be held on May 11th at 8 p. m. to consider what may be done to hasten incorporation. All rat-payers are requested to be present.

Clark's moving pictures were again exhibited in the Opera house on Wednesday. A large audience was present and thoroughly enjoyed the evening's entertainment.

On May 6th Mr. Clark will exhibit the famous moving pictures of the Johnson-Ketchel fight. As the films are most up-to-date there will be a good evening's entertainment.

Ros' estate is still quite brisk. Several large turnouts are being made this week. As dwellings are in great demand there will be an unusual number of buildings erected this summer.

Chandlerian's Stomach and Liver Tablets will clear the sour stomach, sweeten the breath and create a healthy appetite. They promote the flow of gastric juice thereby inducing good digestion. Sold by all Dealers.

**The King is Dead**

London, May 6.—At four thirty in the afternoon, King Edward is believed to be dying. Double pneumonia is reported to have appeared and there is little hope that he will survive if this is true. Oxygen is being administered. The heart action is also becoming affected.

This startling message flashed silently across the whole expanse of British North America during the early hours of this morning. The few words conveyed the message that the empire had lost its head and sovereign, Edward, the Peace-maker.

Surrounded by Queen Alexandra, the Prince of Wales, prelates and advisors he slowly sank into a state of coma from which he only recovered once when he uttered these significant words, "Well, it is all over, but I think I have done my duty."

### Local News

O. N. Ross returned from Fernie on Monday morning.

Lilia Blais of Frank is attending the public school here.

W. A. Martin of Frank paid his weekly visit on Tuesday.

T. Ede, Blairmore's legal light paid us a legal visit this week.

Mrs. J. W. Sader is away in this week with a gripe.

T. W. Davies is building a home for J. Swan on Fourth St.

Dr. J. Westwood expects to arrive home from Princeton B. C. to-morrow.

Arbor Day was generally observed although some mistook it for a holiday.

Spry & Knowles have decorated their hardware store with a suitable coat of paint.

FOR SALE—splendid incubators at less than half price. Apply Drawer G Coleman, Alta.

D. F. Hughes left for Vancouver on Saturday where he intends to re-enter business.

Jas McCracken, formerly accountant at the Coleman Mercantile, left last week for Kamloops.

Rev. W. McMorine left on Tuesday morning for Macleod where he will attend the session of the Rural Deans.

Messrs. Shanley and Sanstram of Fernie were in town this week. Mr. Shanley later left for Vancouver.

Walter Lang, the popular tenor artist of the Pastime Pool Room, has installed a bath and is remodelling his barber shop.

The executive committee of the baseball team met in the Pastime Pool Room on Tuesday evening last. Arrangements are being made to have a couple of games pulled off at Crow's Nest on the 24th.

O. N. Ross, head of the Fernie Cartage Co., leaves today for Michel, where he has secured the contract of building a wagon road thirteen miles up the Michel creek. The rest of Mr. Ross' outfit will be removed to Fernie. We will miss "Old Dad."

The Opera house was only fairly well attended on Saturday night to hear "Grace Cameron." Miss Cameron's efforts were well applauded. So natural is the famous actress that many of her auditors were quite carried away by her dramatic playing. This company will return again this fall.

### STREET RAILWAY FOR COLEMAN AND THE IMMEDIATE TOWNS

It has been authoritatively stated that a street railway line will be constructed from Burns to Coleman this summer. Several of our prominent citizens hold the charter and the first step in the plans would be the purchase of this charter. A franchise will be asked from the different village councils. Exemption from all taxes will also be asked for a period of twenty years.

It is not known yet whether this new company intends to run an hourly service or not.

The return ticket from Coleman to Frank, it is stated will

be fifteen cents.

**STRIKE AT GLACE  
BAY IS ALL  
OVER**

After Being Idle Ten Months—  
Both Men and Company  
Gain Points

The strike in Glace Bay is over at last after a siege of idleness that lasted over ten months. There is great rejoicing amongst the miners and merchants as all have felt the effect of suspended business. Five thousand men reported for duty on Wednesday. The Coal Company, no doubt, have won on some points, while the U. M. W. of America will be recognized as a union in Nova Scotia.

### THE TENNIS CLUB

A meeting of the Coleman Tennis Club was held in the General Office of the International Coal & Coke Co. at 5:30 p. m. on Friday, April 29th for the purpose of reorganizing for the season of 1910.

The following Officers were elected for the ensuing year:

Hon. President: R. W. Riddell

President: Lorne A. Campbell

Vice-President: R. B. Buchanan

Sec'y-Treasurer: E. C. A. Crawford

The Membership Fees for the Season are as follows: Gentlemen: \$10.

Ladies: \$5.00 Non-playing Members: \$2.50 payable in advance.

### The Death of Mrs. Morgan

We regret to announce the sudden death of Mrs. Morgan who passed away at ten o'clock Wednesday evening. Up till the time of her death it was thought that she was improving, but all efforts to save her life were unavailing. Mrs. Morgan was of a quiet retiring disposition and was much beloved by her large circle of friends.

### LITTLE NOTES

Rev. T. M. Murray was the preacher here last Sunday evening.

On the 1st. of May born to Dr. and Mrs. Snyder a son.

Monday was observed here as a holiday many people going to Bellevue to take in the sports and some men who remained at home got into trouble. Frank Dire and Joe Tremblay commenced scrapping, and soon gathered a crowd around them. Presently Const. Jones came on the scene, and the two boxers, found themselves lodged in the cell for the night; and on Tuesday morning were brought before Justice Pinkney, who fined each of them \$10 and costs. They promised not to fight again, they think it doesn't pay.

We note the Rev. J. E. Hunter B. A. B. D. of Pincher Creek, has been called to succeed Rev. J. Sergeant as pastor of the Baptist Church, and we congratulate the B. M. members in securing the services of so able a man. Mr. Hunter is a great scholar and very able preacher, and we predict a great future for the central B. M. church.

## Farm and Garden

### POWER FROM BROOK DAM.

Expert Urges Farmers to Store Up Water For Various Uses.

By EDWARD R. TAYLOR.

Mr. Farmer, what are you doing with the brook on your farm? Letting it have its own sweet way in a hurry and sometimes in a great hurry to get its waters into yonder river? Why not curb it and make good use of it as it passes? John T. McDonald, of Denver, Colorado, says farmers no longer think good use of his brook—drains his house and buildings, runs saws and various machines in a little shop in winter and on rainy days and has enough power in addition to heat his house if it is fitted up for it. Why, don't you do likewise?

The dam is made from stones and earth from the nearby hills, costs but little and is equal to a dam of timber which stands in beautiful front and either fish, and from the paid Mr. McDonald cuts tons of ice per year for himself and neighbors.

It is really the most valuable land he has. Did you know if you have the only pond on your stream all the largest fish will make if their habitation, and if you have a dam, you can have more? The dam saves large dams from below, will come up and settle in your pond, and you and your boys and girls will go fishing there for the profit as well as for the fun of it. Make a safe place and teach the children to swim. Besides, it is stimulating and grateful in summer weather.

I almost think you are really interested, so let me say something now where you have the best site for the dam. Begin the work by laying down sewer pipe two or more feet in diameter and twenty, thirty or more feet long, according to the size of embankment you must build. This can be in the bed of the stream, diverting the water for the time being, and this pipe being a square box of plank as high as you wish the water to be in the pond, it will take away lots of water safely in floods. Near its bottom on the upstream side fix a gate of plank which can be open to drain the pond in summer for repairs. If you put a grating made of iron over the gate, it will keep back all the fish that are too large to go through. This all done in good shape, you can let the water run through the pipe while you are building your dam.

At the right of the spillway of Charles M. Call's dam near my home is a square box connecting with the

BROOK DAM ON A FARM.

sewer pipe just described... This spillway is thirty-two feet wide, and the pier each side stand about four feet above, having been raised after two years ago. After the first fall, Mr. Call had seen the water never get over his bank the previous spring. Too much care cannot be taken in having ample and safe spillway to take all the water that can possibly come down. With such adequate spillways dams are about the best and cheapest a farmer can construct, as almost all the work can be done by an ox or team, which is the best way. Below the spillway on the lower side of the dam is a good place to dump stones if you have them on the farm; if not and the bottom is not of hard material you must finish with cement grout so it cannot undermine.

There is a little power house containing the pump and motor and little if any space left for Mr. Call's house and buildings. The machinery requires little attention being placed once a week and stopped and started from the house by a wire connected with a simple attachment to the head of the water wheel. Here are city comforts right in the home of the farmer. With such a power he can run, run a wood cutting machine, saw wood, run a feed cutter.

Lots of farmers during the dry summer draw water some distance for stock who need not have done so if they had made a pond and retained the flood water. Such a pond would be valuable even if it were not used for power. I have today a letter from a friend who made a dam on his property through his back yard which is dry for several weeks every summer, thus making a pond which stored flood water on the bank of which he set up a gasoline pumping engine, by means of which he irrigated his orchard on land above.

### THE PLANET VENUS.

Night Eternal Reigns Over One-half of Her Globe.

To have the same hemispheres exposed everlasting in sunlight while the other is in perpetual turned away must cause a state of things of which we can hardly fain conceive. But what we know of others. Baked for scores without heat and still baking the sunward face must if unshielded be a Tophet surpassing our powers adequately to portray. And unshielded it must be, as we shall presently see. Reversely the other must be a horizon beyond which our polar regions are temperate abodes, for upon one whole hemisphere of Venus the mean distance never goes so near the sun as we do here. Above the poor dog sat none.

"These beautiful words, dear friends carry with them a sombre lesson."

"Mother Hubbard, you see, was old.

There being no mention of others, we may presume that she was alone—a widow, a friendless, solitary old widow. "Did she die?"—despair! "Did she sit down and weep or read a novel or dream of her past life or sit by the cupboard?"

"The cupboard," she said, "was the cupboard. And here observe that she went to the cupboard—she went to the cupboard. She did not hop or skip or run or jump or use any other peripatetic artifice. She simply and merely went to the cupboard."

We have seen that she was old and lone, and we now further see she was poor, for, mark, the words are the "cupboard," not "one of the cupboards" or "the cupboard" or "the one above, or "the one below," or "the one under the floor," but just "the cupboard"—the one humble little cupboard the widow possessed. And why did she go to the cupboard? Was it to bring forth golden goblets, or glittering precious stones, or costly apparel, or feasts, or any other attribute to wealth? It was to get her poor dog a bone.

Not the centuries pass. An eternity of deadly deathlessness is Venus' status quo.—Dr. HERCULAS LOWELL IN POPULAR SCIENCE.

### OLE BULL

Not a Classical Player, but He Bewitched His Masters.

The truth is that Ole Bull was not a classical player. As I remember him, he could not play in strict tempo. Like Chopin, he indulged in the rubato and abused the portamento. But he knew his public. America, particularly in the regions visited, was not in the mood for the "music of the spheres." "Dido and Aeneas" and "Arbaces the Traitor" were the mode. Bull played them both, played jigs and old tunes, roused the echoes with the "Star Spangled Banner" and Irish melodies. He played such things beautifully, and it would have been musical snobbery to say that you didn't like them. You couldn't help it. The grand old dame bewitched you.

He was a handsome Merlin, with a touch of the charlatan and a touch of Liszt in his tall, willowy figure, small waist and heavy head of hair.

White hair! He stumbled in masses about his kindly face like one of his native Norwegian countrymen. His white hair was old, but I never saw except Walt Whitman, at that time a steady attendant of the Carl Gaertner string quartet concerts in Philadelphia. (And what Walt didn't know about music he made up in his love for stray dogs.) He was seldom without canine company. James tiekner in Everybody's Magazine.

### A Lesson For Nellie.

Mrs. Washington was a strict disciplinarian about certain matters and among other things always required the members of the household to follow the example of her husband and dress for dinner, which was at 3 o'clock. On one occasion Nellie Curtis and her cousin Martha Bell were sent to the table in their morning gowns, but no comment was made upon it until a coach was seen approaching and the visitors, some French officers of high rank and Charles Carroll, Jr., of Carrollton, one of Miss Curtis' green suitors, were announced. Instantly the girls, a flutter of excitement, begged to be excused in time to be dressed before the arrival of Mrs. Washington who shook her head "No," she said. "Remain as you are. A costume good enough for President Washington is good enough for any guest of his." Needless to say, Miss Nellie never overlooked her proper garb for dinner again.—National Monthly.

### Sensible Sandy.

While passing by an old fashioned inn in Scotland the tourists were attracted by an ancient bagpiper, who was tooting atrocious sounds through an instrument that was both dilapidated and squeaky. "Great Jericho, Sandy!" exclaimed one in desperation.

"Why don't you stop your bagpipes?" asked the old man, ceased playing and looked up, in astonishment. "Havers, men, ye dinna understand! If ma bagpipes wot ye good tune the inn man wina give me 2 shillings to move on."

### Wind Velocity.

The majority of people are unable to estimate wind velocity. When the smoke from a chimney moves in a straight, vertical column, it means that one to two miles an hour breeze is blowing. A three miles an hour wind will just stir the leaves on the trees. Twenty-five miles an hour will sway the trunks; at forty the small branches will break and it takes a mile a minute gale to snap the trunks of big trees.—London Answers.

### Advice.

"Nobody listens to advice."

"You're wrong. One fellow always does."

"Who's that?"

"The fellow who's giving it."—Cleverland Leader.

### No Difference.

Jinks!—Which women have the worst tempers blonde or brunettes? Binks!

My wife has been both, and I could not see any difference.—New York Times.

### MODEL OF POPULAR LECTURE.

Satire on Some Oratory Now Less Frequent Than Formerly.

"THE words of the subject for this evening are:

"Old Mother Hubbard, she went to get her poor dog a bone."

But when we got there the cupboard was bare.

And the poor dog sat none.

"These beautiful words, dear friends carry with them a sombre lesson."

"Mother Hubbard, you see, was old.

There being no mention of others, we may presume that she was alone—a widow, a friendless, solitary old widow.

"Did she die?"—despair!

"Did she sit down and weep or read a novel or dream of her past life or sit by the cupboard?"

"The cupboard," she said, "was the cupboard."

We have seen that she was old and lone, and we now further see she was poor, for, mark, the words are the "cupboard," not "one of the cupboards" or "the cupboard" or "the one above, or "the one below," or "the one under the floor," but just "the cupboard"—the one humble little cupboard the widow possessed.

And why did she go to the cupboard?

Was it to bring forth golden goblets, or glittering precious stones, or costly apparel, or feasts, or any other attribute to wealth? It was to get her poor dog a bone.

Not the centuries pass. An eternity of deadly deathlessness is Venus' status quo.—Dr. HERCULAS LOWELL IN POPULAR SCIENCE.

### WHERE WINTER IS WINTER.

London Sphere Publishes Appreciation of Canada's Climate.

One's first winter in Canada is an experience that will ever conjure up memories of glittering scenes of snow and ice, of snowballing, and skating, sligging, carolling, and other winter sports which have lost none of their popularity, and have made Canadian winters as popular. Sir Wilfrid Laurier, speaking of the glory of Canada, said: "The Canadian winter is the glory of Canada. I do not know anything so beautiful as a winter night, in the bluest of skies, is studded with millions of gems never seen to such advantage as in the country of the north."

A great feature in the winter of a Canadian winter is the ice carnival,

when the inhabitants all vie with one another as to who shall do the most for the carnival.

The streets are packed with the

## Had Eczema on Legs For Twenty Years

Thinks No One Could Have it Worse  
—Was Cured by DR. CHASE'S  
OINTMENT

There are plenty of more fatal diseases than Eczema, but not many which cause more tormenting suffering.

The tendency of eczema to spread over the body is annoying and discouraging, and the itching—the almost uncontrollable desire to scratch—nearly drives a person crazy.

You can scarcely wonder that people are enthusiastic over Dr. Chase's Ointment, which gives them prompt relief and actual cures when the tormenting comes.

"And if you could read a few hundred of the letters we receive from time to time you would not be long in deciding what treatment to give your patients," said Dr. Chase's Ointment.

Mr. Fred W. Clark, Peterborough, Ont., writes: "My mother had eczema in both legs for about 20 years. She doctor'd for a long time

and tried everything for it, but got no relief until a friend advised her to use Dr. Chase's Ointment, which she got." "She found that Dr. Chase's Ointment gave her great relief, so she got some more and continued this treatment until the eczema had entirely cleared up."

I don't think any one could have this disease worse than she did, and shall not attempt to describe her case.

Dr. Chase's Ointment is to any one suffering from eczema."

It is such cure as this that has made Dr. Chase's Ointment the most popular ointment for dermatitis in Canada. It will only disappoint those who insist on getting what you ask for you will be better pleased afterwards.

Do not be misled by copy

Dr. Chase's Ointment, 60 cents a box, all dealers, or Edmanson, Bates & Co., Toronto. Write for free copy of Dr. Chase's Recipe.

## LIVE BABY FOR BAIT.

Baboons of the Congo Have Successfully Resisted White Man.

To bait spring guns and man traps with live babies seems to be a regular device with the simple Congo forest tribes, who know that the white man is afraid of "baboons" in general. This peculiarity was discussed recently before the Royal Geographical Society in London by Mr. E. Torday, who told of Mr. Elmer Simpson and Mr. Norman Hawley, on their expedition between October, 1907, and September, 1909, to investigate the native tribes in the Kasai Basin, in the Congo.

The Bakuto said they were almost the only tribe of this region who had been successful up to the present in resisting the advance of the white man. This was due to their skill in forest warfare. The way leading to their village was defended by poisoned spikes hidden by leaves.

They had bows and arrows set like traps, and for some time resisted the gunners, and they used the baby bait because they knew the European would be unable to resist the temptation to capture the apparently abandoned child. The poison they used was absolutely deadly.

When Mr. Torday, after the expedition had been saved from death by a negro, an old-fashioned conjurer, tricked and forced the tribe to volunteer to carry their loads to the next village in safety, he threatened to set fire to the river, and as a beginning to do it, he stepped into the water. This convinced the natives that the white men were able to destroy anything, and they were naturally very keen to get rid of the magician.

The doctor, Simpson, had to play through a difficult period in respect of currency. The territory of the Bakoto had never before been crossed by white men. The coinage of the tribe was a mass of bars of iron weighing two pounds and a half, English money at exactly sevenpence.

When the people heard that the traveler's stock of iron was nearly finished, they became very hostile.

Mr. Torday explained that:

"The chief brought about the climax by ostentatiously stealing our chickens, and this was, of course, a declaration of war. He probably expected us to burn the village, and we would have to fight our way back to civilization."

He left the village, however, and chief gave them the means of an escape from the difficulties. After the theft of the chickens, he came and explained that he had no bad intentions toward us, and that we had better not decide to kill them. Said the lecturer:

"I replied that if he wanted war he could have it, and I would allow all the negroes to go to him. Another asked the compass, which enables men to navigate the seas. Another contend for Edison. Still another for the Wrights."

Finally one of them turned to a white man who had remained silent.

"Whom do you think?"

"Well," he said with a hopeful smile, "the man who invented inter-

est, you will see, will be the first to invent something."

Mr. Torday said that amongst the negroes, he came and explained that he had no bad intentions toward us, and that we had better not decide to kill them. Said the lecturer:

"I replied that if he wanted war he could have it, and I would allow all the negroes to go to him. Another asked the compass, which enables men to navigate the seas. Another contend for Edison. Still another for the Wrights."

Relying on the imagination of the negro, I proposed to show my electrical invention to the chief, and accordingly took it before my tent. When I entered, I wound up the elephant, and made it walk on some boxes, and then the tent door was thrown open; our friends, the uncanny beasts, wanted to run away.

Mr. Simpson insisted that he should have another look, but this was too much for the chief, who shouted, "Get out!" and ran into the bushes.

Mr. Torday said that amongst the negroes, he came and explained that he had no bad intentions toward us, and that we had better not decide to kill them. Said the lecturer:

"I replied that if he wanted war he could have it, and I would allow all the negroes to go to him. Another asked the compass, which enables men to navigate the seas. Another contend for Edison. Still another for the Wrights."

A discovery resulting in an art, an art produces a useful commodity, and made cheaply accessible adds family to the population; and a family is a new creation of thinking, inventing, and improving human beings. The idea of arriving at the end, we are at the beginning of the series, and ready to start with rounded numbers, on the great and benevolent career of useful knowledge.

—Edward Everett.

Fifteen million gallons of water a day are pumped from the mines of the Canadian Gold Belt. This is estimated that 250 tons of ore are raised for every ton of ore mined.

A small lump of camphor dropped in the oil receptacle of a lamp will improve the light and make the flame clearer and brighter. A few drops of vinegar will have a similar effect.

Catarrh Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the internal parts of the body, and in order to cure it you must take a general remedy.

Take a small quantity of the best peruvian bark, and mix it with the best dried

aloe vera, and boil it, add a few drops of the best boiled, purified, aromatic direct on the

water, and drink it.

Coleman, Friday, May 6, 1910

### EDITORIAL NOTES

Incorporation means a road with a sidewalk to Slav town at once.

Thirty thousand farmers in Alberta have the smile that even rain will not take off.

The custom's returns and the expenditure bills passed at Ottawa show that Canada is not on the poor pay list.

### More Delays

The announcement that the only hitch in the incorporation proceedings was the delay of the government in passing the necessary order-in-council comes as exasperating news. Delays are always dangerous. In this matter it is not only dangerous but disastrous to the public and private interests of Coleman.

The health of the town is endangered, the value of property is kept at a low ebb, the opportunity to obtain the right to borrow money on debentures is thrown away and our status as a town held up to ridicule. To the citizens the long delay has proved irritating and consequently a meeting will be called to thoroughly thrash out the vexed question.

### Local News

For Sale Cheap—In order to save cost of removal to Victoria, I will sell my Piano and Piano-a. For further particulars apply to D. J. Hill, Coleman, Hardman Co.

The committee in charge of the Rectory fund for St. Albans church report satisfactory progress in their canvass for subscriptions.

A meeting will be held in the F. church on Monday evening, May 6th at 8:30 for the purpose of forming a branch of the Sons of Viking and Benefit Society all young Englishmen are welcome to attend.

The Carbondale Lumber company have opened up an office in West Coleman and are prepared to supply any town in the Pass with rough or dressed lumber at special prices.

The Enterprise has just published a very readable booklet on the resources of the towns and the Pass. The halftones on the whole show up remarkably well.

J. Anderson has secured the contract of grading and semi paving Dominion Avenue in Frank the street when completed will have a shale finish that will last over twenty years.

The International has received a letter from Professor J. P. Porter of McGill University Montreal that will bring a number of students to Coleman on May 18th. This class will remain five days studying coal mining and gauging as much practical information as possible.

Twenty acres of fine level land, worth at least \$6,000, are to be present to the city for park purposes by F. H. Riley, P. P. The land lies just north of the present terminus of the Hillhurst car line, and constitutes the most valuable gift of the kind ever given the city.

### Congratulates Macleod

(Lethbridge Herald)

Macleod is to be congratulated on passing by such a large majority a by-law to spend \$65,000 for a new up-to-date hospital. That is an excellent sign of progress, just as much as if it were for cement walks or a sewer system.

### POSITIVE CURE FOR INDIGESTION

If you have indigestion your food ferments in the stomach and bowels. It does more; it decays, and the nutritious matter which should go to make new blood, decays with it, and this leads to an impoverished condition of the blood, to nervousness, biliousness, constipation, sick headache, bad breath which disgusts your friends, and other disagreeable and unpleasant conditions.

And all this trouble is caused by the food that doesn't digest, but ferments and oftentimes rots in the stomach.

And fermentation is caused by the stomach not being strong enough and energetic enough to thoroughly mix the food with the digestive juices.

M-I-O-N-A is responsible for tens of thousands of cures. In fact, it is such a positive cure for indigestion and all stomach troubles that it is guaranteed to cure or money back.

The price of a large box of M-I-O-N-A tablets is 60 cents, and they are sure to promptly relieve the worse case of indigestion or gastritis. Try them.

### Government Has Solved The Problem

Such one was the Doukhobor problem in the eyes of the Canadian Government when in 1907 the agents of the Government had completed the last settlement with the singular Russian sect whose members, Alymer Maude, their erstwhile friend and adviser, so aptly characterized as a peculiar people. Seemingly the last resource had been exhausted in the effort to satisfy the wishes of these people, and, at the same time mould them into Canadian citizens, or put them in the way of working out their own salvation, and it was felt that if they could be left entirely alone and be permitted to remain out of the public eye for a period of years, time, affording opportunity for the development among them of a proper appreciation of British customs, British justice and British institutions, could be depended upon to work out the most satisfactory adjustment of their case that could be hoped for.

But that consumption, it seems, was not to be realized in the measure that could have been desired. A recent interview in a western newspaper in which the leader of the Doukhobors alleged duplicity on the part of the Government in its treatment of his people, has had the effect of reviving the Doukhobor question to the extent of promoting considerable newspaper attention, editorial or otherwise, to the subject.

Since the question has been thus unwillingly forced into the limelight, it may be regarded as pertinent if some historical facts which may or may not have been common knowledge hitherto, but which, if they were, have not been widely disseminated, be retold. Their recital will vindicate the Government in its assumption that time, patience and tolerance would constitute the safest, surest and most efficient of ministers plenipotentiary for dealing with a situation so difficult and at one time so seemingly hopeless of successful negotiation.

### CHARACTER AND RELIGION

To properly comprehend the difficulties the Canadian Government met with in dealing with the Doukhobors, at least a fair understanding of the Doukhobor character and religion is necessary.

The Doukhobors are dissenters from the ritualism or materialism of the Russian church. They are the product of the reaction against the externalism of the Greek Orthodox Church, which began in the latter half of the eighteenth century, but they did not become a compact sect until the early part of the nineteenth century. The Russian government at that time set apart for their occupancy a tract of land near the sea of Azov, the Milky Waters, in southern Russia, where they remained for about fifty years. In 1869 the government banished them to trans-Caucasia. They were more or less persecuted for their dissent from the Russian church through all the intervening years but it was not until 1887 that the serious persecutions commenced toward all sects who refused to perform military service, which rendered the position of the Doukhobors in particular, well nigh intolerable.

This caused a revival by the Doukhobors of their religious propaganda, and about 1888 what was known as the Great Party, decided upon the policy of bringing together all the instrument of warfare in their possession and destroying them. That act was construed as an act of rebellion and the persecutions became even more rigorous than before. This culminated in 1888 in permission being obtained from the Russian government, through the instrumentality of Prince Hilkoft, Count Tolstoi and others, for the Doukhobors to emigrate.

### Report Of The Swine Commission

The report of the Commission sent last year by the Dominion Government to Europe to study the swine rearing industry has been issued. It consists of a pamphlet of sixty pages of printed matter and a large number of striking illustrations.

The countries visited were England, Scotland, Ireland, Denmark, and Holland; Denmark and Ireland, being the strongest competitors of Canada in the British market, received most attention. The report describes clearly how the hogs are bred and reared, and the various steps taken to develop the export bacon trade. The far famed co-operative system, as applied by the Danes to the breeding and rearing of the swine, the packing and marking is fully described. Co-operative feed buying, which involves the purchase of over six hundred million pounds of grain, oil, lard, etc., a year is fully dealt with.

A valuable feature of the report is the attention given to the method followed in the different countries for maintaining harmony between farmers and packers, and the securing of a uniform supply of pigs, co-operation not only between farmers, but between packers and farmers, and is credited with excellent results. This is especially true in England in bacon curing vicinities.

After dealing with the various phases of production in the different countries a chapter is devoted to the English bacon trade and another to lessons for Canadian farmers and packers. The report is comprehensive and practical and therefore of value to every swine raiser in Canada. Copies may be procured free by writing the "Sive stock Commissioner" at Ottawa.

### To Dismiss The Government

Edmonton, May 2.—The Bulletin this morning said an improbable report gained circulation on the street last night to the effect that His Honour, Lieutenant Governor Bulver intends to dismiss the Rutherford government and call on Chief Justice Sifton to form a cabinet. The report is that after the conference of the insurgents in Red Deer on Friday last representations were made to His Honor which convinced him that no compromise between the warring factions could be reached.

The report is improbable; first because such action on the part of a Lieutenant-governor would be unprecedented; secondly because Chief Justice Sifton has not resigned; and thirdly because affairs, politically speaking, are in state quo pending the report of the Royal commission inquiring into the Alberta and Great Water War charges.

Neither confirmation nor denial of the report could be secured last night.

### New Copper Find.

Spokane, Wash., April 27.—George B. Squires, of Nelson, B. C., formerly connected with the metallurgical department of the American Smelting and Refining company in Mexico, has come to Spokane with news of the discovery of a new copper district in western British Columbia about 120 miles north of Vancouver.

Mr. Squires says values were low in copper and fair in gold at the surface, Mr. Squires said, adding that they have undergone improvement as depth has been attained. At the 100-foot point in the shaft the cubic contents is 15 per cent. The ledge is 12 feet wide. The condition is approved by miners, who like a copper mine beginning at the bottom rather than at the top.

The discoverer and the few men he employed were the sole mining inhabitants of the country throughout a radius of perhaps a score of miles. When the merit of the ledge had been established 800 acres of ground was located. It is calculated that copper is worth a half cent more on the coast than inland, because of its convenience to water transportation.

Mr. Squires also reports that the Portland Canal district is the scene of increased activity. Gold has been scratched out a several new pits.

A touch of rheumatism, or a twinge of neuralgia, whatever the trouble is, Chamberlain's Liniment drives away the pain at once and cures the complaint quickly. What application gives relief, Sold by all Dealers.

Andy Good, Proprietor of the Sunburst Hotel, Crow's Nest.

NORTH FORK, Alta., April 20, 1910.

Editor Coleman Miner:

Sir—A few days ago we had a lecture by C. M. O'Brien, M.P.P., in our school house, the result of which has been alarm, apprehension and dread of all the good wives and mothers of this district. Trouble enough exists on behalf of Halley's comet without the member for the Rocky Mountain district making it worse. He told us he had discovered that the food of the farmer of this country was consuming constipated chiefly of ground peanut shells and sawdust, which statement was the "piece de resistance" of the whole lecture.

It has created an apprehension in

the minds of the more nervous of the population, that, if for instance their dear ones were chased by an angry steer, and in their flight through a wire fence they should rip their skin open the said would all blow away and their would be nothing left but a suit of clothes, and in some instances, perhaps, a bun-h of whiskers.

It is a surprise to the people of the North Fork district that the elector of the neighboring constituency of Rocky Mountain should elect a man of such a mental calibre.

FARMER.

### PUBLIC NOTICE

**LA GRIPPE****Arrested, and Consumption Cured**

Mr. G. D. Colwell, of Vancouver, B.C., was taken down with Consumption and it left him in a very bad condition. He says: "I was all over down and bordering on Consumption. I could not sleep at night, had awful dreams, and coughed nearly the whole time. I was weak, when I began to take Psychine, it was a nervous state; but from the first bottle I began to improve. It did marvels for me and brought me back to health no time at all. New man." It found its way to the attacks of La Grippe and is a sure preventative. I always take Psychine if I feel a cold coming on and it puts me right in no time.

**NO HOME SHOULD BE WITHOUT PSYCHINE**

For Sale by all Druggists and Dealers, 50c. & \$1 per bottle.

Dr. T. A. SLOCUM  
LIMITED,  
TORONTO

**He Was "Next"**

"The junior partner wants to see you right away," announced the office boy. "I guess it's the bounce for yours."

"Nix," responded the office boy. "He only wants to find out what new players have been signed."—Washing-ton Herald.

**Shiloh's Cure**

Quickly stops diarrhea, cures colic, etc.

Read about Shiloh's Cure.

25 cents

Mistress—Bridge, it always seems to me that the craniest mistress gets the best books.

Cook—Ah! Go on wid yer blarney!

A Pleasant Purgative.—Parmelee's Vegetable Pills are compounded of vegetable extract with the stomach and the bowels, so that they act along the whole alimentary and excretory passage. They are not drastic in their work, but mildly purgative, and the pleasure of taking them can't be equalled by the gratifying effect they produce. Compounded only of vegetable substances the curative qualities of which are fully tested, they afford relief without chance of injury.

"Old Grabber ought to be satisfied with the money he has."

"He's satisfied—so much so that he wants a lot more, exactly the same kind."

**Minard's Liniment Cures Burns, Etc.**

When young a girl wonders if she will ever meet a man she would marry; after she gets older she wonders if she will ever meet one she wouldn't marry.

Your Druggist Will Tell You Murine Eye Remedy relieves Sore Eyes, Strengthens Weak Eyes, Doesn't Smart, Soothes Eye Pain, and sells for 50c. Try it now in Baby's Eyes for Sealy Eyelids and Granulation. 1

Roots do not absorb free water of the soil—which will drain away and give a chance. It is the moisture held by soil particles which is used by plants.

**Minard's Liniment Cures Burns, Etc.**

Worn-out lace curtains cut into squares make good dishtowels.

A Thorough Pill. To clear the system of all kinds of impurities and irritants is necessary when their action is irregular. The pills that will do this work thoroughly are Parmelee's Vegetable Pills, which are made of vegetable extract in result. They purge painlessly and effectively and work a permanent cure. They can be used without fear by the most delicately constituted, as there are no painful effects preceding their gentle operation.

Bigley—The motormen and conductors are going to give an opera, but where?

Littleton—What one?

Bigley—"Carmen" of course.

**NURSING MOTHERS****Show the beneficial effects of****Scott's Emulsion**

in a very short time. It not only builds her up, but enriches the mother's milk and properly nourishes the child.

Nearly all mothers who nurse their children should take this splendid food- tonic, not only to keep up their own strength but to properly nourish their children.

FOR SALE AT ALL DRUGGISTS

Send Mr. Scott, name of place and this ad. for our beautiful Savings Book and Child's School-Book. Book bound in leather.

SCOTT'S EMULSION

125 Wellington Street West, Toronto, Ont.

W. N. U., No. 791.

**Nothing in That Line**

Mrs. Budgett bent her gaze on George.

"Have you read Mr. Catchford's yellow book?" she asked him.

"I have, dear—it is very interesting!"

Never appears the haughty police-officer who is girded with a sense of humor. A few days ago the King's yacht was lying in the bay, and as the King was going to sleep on board, he crossed the deck on the following morning, the old lad went up to one of the constables and asked him if he could tell her who was going to guard His Majestys all night.

The constable remarked that himself and several others were on the boat, and were going to take it in turns in swimming round the boat all night, thus keeping away any disturbers of the King's sleep. With this the old lady seemed satisfied.

An automatic time signal sent out from the Hambleton observatory by telephone to the instrument room, with the system of that city has been heard as far as Copenhagen and Paris.

The English sailors were at one time prohibited from carrying passengers who were going to prize-fight.

**Internally and Externally It Is Good**

Good for the curative property of Shiloh's Cure. It is also that it can be used internally for many complaints as well as externally.

For sore throat, croup, whooping cough, colds, rheumatism, etc. It is kindred to the chest, colds, and gripes.

The English sailors were at one time prohibited from carrying passengers who were going to prize-fight.

Her Ladyship—"Have you given Buttons?" "Yes, um."

"And his cutlet?"

"Yes, um."

"And his jelly?"

"Yes, um."

Her Ladyship—"Then you may have some bread and cheese and go to bed."

**USING PURGATIVES INJURES HEALTH**

**What You Need in Spring is a Blood Building Tonic**

A spring medicine is an actual necessity to most people. Nature demands it as an aid in getting off the impurities which have accumulated in the blood during the indoor life in winter. But unfortunately thousands of people do not recognize the necessity of a spring medicine do not know what is best to take and dose themselves with hars, griping tonics.

This is a serious mistake. Ask any doctor and he will tell you that the giving of purgatives weakens the system but does not cure disease.

In the spring the system needs building up—purgatives cannot do this. The blood should be kept strong.

It is not, however, so much the style of the substance of Collingwood's letters that will give the reader the sense of intimacy; even when the English is written in a simple way, it may be faintly imagined from the fact that at one time he kept the sea for twenty-two months without so much as once letting go an anchor. As he had written to his wife in the battle of Caudiz in 1809: "A battle is really nothing to the fatigues and anxiety of such a life."

Fortunately, though materials seem to give a picture of the varied life of Collingwood, it is possible to find the substance of his letters, which are excellent reading. "I know not where he got his style," wrote one of his admirers, "but he writes better than any of us." Perhaps that is true of most sailors; they have leisure and loneliness, and minds less cramped with care.

It is not, however, so much the style of the substance of Collingwood's letters that will give the reader the sense of intimacy; even when the English is written in a simple way, it may be faintly imagined from the fact that at one time he kept the sea for twenty-two months without so much as once letting go an anchor. As he had written to his wife in the battle of Caudiz in 1809: "A battle is really nothing to the fatigues and anxiety of such a life."

His sense of humor is intermittent, but in this vein he loves especially to play with Bounce, the dog (in prose and verse), and admirably relieves the solemnity which naturally accompanies his elevation. His wit is not wanting in妙处.

It is not, however, so much the style of the substance of Collingwood's letters that will give the reader the sense of intimacy; even when the English is written in a simple way, it may be faintly imagined from the fact that at one time he kept the sea for twenty-two months without so much as once letting go an anchor. **A WONDERFUL CAPTAIN.**

Collingwood Had Misfortune Always

to Follow Someone.

Collingwood's fame is great and lasting, but in the imagination of his fellow-countrymen he remains a somewhat shadowy figure among the more tangible heroes of his time, and of spiritual achievement and of military reputation, but one who never won success or first, across the stage, says Henry Newbold in the London Graphic. This was his destiny from the beginning; wherever he went in life he found a greater man ahead of him.

There is something strangely ominous in the regularity with which he was sent by fate to sail Nelson's wake. As a lieutenant he succeeded in the famous battle of Trafalgar, and then in the Bristol Channel, as a commander he followed him in the Badger, and as a post-captain in the Hinchingbrook. This was his destiny from the beginning; wherever he went in life he found a greater man ahead of him.

There is something strangely ominous in the regularity with which he was sent by fate to sail Nelson's wake.

As a lieutenant he succeeded in the famous battle of Trafalgar, and then in the Bristol Channel, as a commander he followed him in the Badger, and as a post-captain in the Hinchingbrook. This was his destiny from the beginning; wherever he went in life he found a greater man ahead of him.
